A New, Clever, Automated Method for Identifying Laboratory Rodents

The PROBLEM...
Over 50 Million...
lab rodents are used each year!
And they ALL look alike!

The SOLUTION...
RapID™ Tags...
The most humane, accurate, automated, lab animal ID tags available!
RapID Tag: A Mouse-Eye View

Multiple colors allow rapid, secondary (visual) identification without scanning or disturbing caged animals.

Humane (painless), secure, lightweight design.

100% MRI and autoclave compatible.

Made in the USA.

2-D Matrix Barcode
- Easily and instantly scanned
- 100% reading accuracy
- Automated data collection
- Millions of unique codes

Biologically-inert, medical-grade, advanced polymer material. Virtually indestructible.

Quick and easy to apply or remove with nominal training.
Why are RapID Tags Better...

Superior Technology; Unique Design

- Most humane ID method; no ear deformation
- 100% accurate, automated data collection
- Easy, fast scanning
- Multi-colored for quick visual ID without scanning
- Secure, virtually indestructible, lightweight design
- Minimally invasive
Even More Reasons Why...

Innovative Features & Benefits

• Apply or remove in seconds with only nominal training
• Made from biologically-inert, medical-grade polymers
• Suitable for most strains of mice
• Most cost-effective, automated method (reduced study costs)
• MRI and autoclave compatible
• Proudly designed and manufactured in the USA
RapID Tags vs. Metal Tags

RapID Tags
• Accurately scanned
• Automated data collection
• Secure, hoop-less design
• No ion tissue reactions
• Multiple colors
• MRI compatible

Ordinary Metal Tags
• Cannot be scanned
• Not applicable
• No
• Tissue reactions common
• No
• No
RapID Tags vs. Inhumane Methods

RapID Tags
• Most humane method >
• Fast, accurately scanned >
• Automated data collection >
• Minimally invasive >

Notching/Punching/Clipping
• Most inhumane methods
• Not applicable
• Not applicable
• High risk of infection
### RapID Tags vs. RFID

<table>
<thead>
<tr>
<th>RapID Tags</th>
<th>RFID Chips</th>

RapID Tag’s Exclusive Features

Cutting-edge Technology

- Hardened 2-D barcode
- Medical-grade advanced polymer body
- Exclusive combination of alpha-numeric digits
- Millions of unique ID numbers

5 COLORS

- Ultra-fast visual identification without disturbing caged animals
- Automatically matched to computer-generated, colored cage-card and specimen labels using our exclusive website application
